Cardiovascular Conditions - 3

Affecting a greater number of people in an aging population, the treatment of cardiovascular conditions continues to be one of the highest priorities in the NHS. With the right information, healthcare professionals can ensure they are managing the risk factors, care and rehabilitation related to these conditions as effectively as possible. We have provided a list of relevant articles from MA Healthcare journals dealing with this area, providing your staff with research, information and tips that will support both their work and the quality of care for their patients.

British Journal of Cardiac Nursing

- COVID-19 outcomes in patients with pre-existing cardiovascular disease and risk factors: perspectives from a hospital in Ireland
