Cardiovascular Conditions

Affecting a greater number of people in an aging population, the treatment of cardiovascular conditions continues to be one of the highest priorities in healthcare. With the right information, health professionals can ensure they are managing the risk factors, care and rehabilitation related to these conditions as effectively as possible. We have provided a list of relevant articles from MA Healthcare journals dealing with this area, providing your staff with research, information and tips that will support both their work and the quality of care for their patients.

British Journal of Cardiac Nursing

- AI-enhanced global registry of acute coronary events score: implications for nursing in non-ST-elevation acute coronary syndrome
Published online: 31 January 2026
<https://doi.org/10.12968/bjca.2026.0005>
- Cardiovascular inequality, passive detection and the case for targeted community case finding
Published online: 2 March 2026
<https://doi.org/10.12968/bjca.2026.0016>
