Mental Health

Ensuring optimal care for mental health is an increasingly important concern for professionals working across a variety of healthcare settings today. Not only is it essential for maintaining the long-term physical health and well-being of patients of all ages but should also be a priority for the self-care of professionals themselves. We have provided a list of relevant articles from MA Healthcare journals dealing with this area, thereby providing your NHS staff with research, information and tips that will support both their work and the care of their patients
